

INTERNATIONAL TALLINN 2021 PEATLAND CONGRESS

2nd - 7th May 2021

Creative Hub, Tallinn, Estonia

GUIDELINES FOR THE SHORT ABSTRACT SUBMISSION

All authors, who submitted the short abstract for IPC2020 or IPC2021 and have received the approval from the Scientific Committee are invited to submit an extended abstract for the IPC2021.

Extended abstracts should be written in MS Word using the official IPC2021 template.

[Download the IPC2020 extended abstract template here.](#)

Extended abstract must be submitted electronically, using the extended abstract form, that is accessible from the Congress website: www.peatlandcongress2021.com/papers

Volume: Maximum five pages in A4 format, including tables and figures.

Language: All articles must be written in English. The Scientific Committee strongly advises to use professional proof-reading services before article submission. Especially if you are not native speaker.

FORMATTING:

All articles must follow the structure:

- SUMMARY
- INTRODUCTION
- MATERIALS AND METHODS
- RESULTS
- DISCUSSION
- CONCLUSION
- ACKNOWLEDGEMENTS
- REFERENCES

The title of the abstract must be written in UPPERCASE letters, Times New Roman 12 pt., bold.
Subtitles of the abstract (SUMMARY, INTRODUCTION etc) must be written in UPPERCASE letters, Times New Roman 10 pt,

Plain text of the abstract must be written in Times New Roman 10 pt. Please do not use bold, italic etc formatting in abstract text.

Tables and figures (if any) must be placed into the text of the abstract, after the first reference in the text. If you are inserting pictures, please make sure that they are in good quality. Avoid images with very small and/or blurry text as they will not appear as readable in the printed proceedings.

All Tables and Figures must have titles and are referred in the text as (Table 1), (Figure 1). The table title should be placed on the top of the Table and the Figure title on below of the drawing. The table and the figure should be complete and understandable in their own right.

Units of measurement should comply with international standards (SI units) and should be distinct from the variable measured (e.g. dry density in g m^{-3} ; NOT density in g DM m^{-3}).

Please use standard abbreviations (mm, m, Ma, t, °C, NW-SE, Pb, etc.).

Use the word-ending 'ise' rather than 'ize' where both are available, e.g. 'minimise'.

'Circa' should be abbreviated to 'ca.' May be used to indicate approximate historical dates but NOT approximate quantities.

Use long hyphens [Ctrl+Fn+;(semicolon)] for the page ranges e.g. "237–261" and short hyphens to divide and connect words, e.g. "half-baked".

LIST OF REFERENCES:

The References should include all the citations quoted in the text and only those citations, listing the authors alphabetically and then chronologically when several references by the same author(s) are given.

Quote journal names in full, NOT abbreviated form. References should be cited as "in press" only if already accepted for publication, in which case the journal name, volume number, year and/or doi must be stated.

Book and journal titles should be in italics with upper case initial letters. For books, please give the publisher, place of publication and either the total number of pages or the page range for the material cited. Where a reference is published in a language other than English, a translation of the title should be given in parentheses and the language of publication indicated.

For items that are available both on paper and online, "Online at:" and a web address may be appended in the reference list. References which are exclusively available by internet, and whose authorship is not clear, should be listed under the name of the author or owner of the web site.

Where the reference is in a language that is written in non-Roman characters, the 'international standard' Roman transliteration of the citation should be used.

Examples:

Williams, S.T., Gray T.R.G. (1974) Net primary production of the dominant bryophytes in a Sphagnum-dominated wetland in West Virginia. *Bryologist*, 86: 280–286.

Turbridy, M. (ed) (1984) Creation and management of a heritage zone at Clonmacnoise, Co. Offaly, Ireland. EEC Final Report, Environmental Science Unit, Trinity College Dublin, Ireland: 206 pp.
